RECENT TRANSACTIONS

FilterExport CSV

TRANSACTION ID	DATE	TYPE	AMOUNT	STATUS
TXN-4920211	Oct 24, 14:22	USD → EUR Swap (Wise)	\$45,000.00	SETTLED
TXN-4920208	Oct 24, 11:05	Withdrawal to HSBC HK	\$12,400.00	PENDING
TXN-4920201	Oct 23, 18:40	GBP → NGN Swap (Verto)	£8,200.00	SETTLED
TXN-4920195	Oct 23, 09:12	Inbound EUR transfer	€24,500.00	SETTLED

Key Features:

- Transaction list with status (pending, completed, refunded)

User Story:

As a merchant, I can view all payments, filter by status/currency, and process refunds without contacting support.

4. Merchant Dashboard - Invoicing

Figure: Merchant Dashboard - Invoicing

Key Features:

- Create invoices with line items and tax calculations

User Story:

As a merchant, I can create a multi-currency invoice in under 60 seconds and track when it gets paid.

5. Merchant Dashboard - Analytics

Figure: Merchant Dashboard - Analytics

Key Features:

- Revenue charts by day/week/month

User Story:

As a merchant, I can identify my most profitable hours, items, and customer segments to optimize operations.

6. Menu Management - Items

Figure: Menu Management - Items

Key Features:

- Add/edit items with photos (base64 or URL)

User Story:

As a restaurant manager, I can update my menu in real-time - mark items as sold out, change prices, add seasonal specials - all without technical skills.

7. Menu Management - Multiple Menus

Figure: Menu Management - Multiple Menus

Key Features:

- Create unlimited named menus

User Story:

As a restaurant owner, I can have a breakfast menu auto-activate at 6am and switch to lunch at 11am without manual intervention.

8. Menu Management - Zones

Figure: Menu Management - Zones

Key Features:

- Create zones with table number ranges

User Story:

As a hotel manager, I can show pool guests only drinks and snacks while restaurant guests see the full dinner menu - automatically based on their table.

9. Menu Management - Schedules

Figure: Menu Management - Schedules

Key Features:

- Set start/end times per menu per day

User Story:

As a bar owner, I can set happy hour (4-7pm weekdays) and late-night menu (10pm-2am Fri-Sat) and they activate automatically.

10. Menu Management - External Menus

Figure: Menu Management - External Menus

Key Features:

- Upload PDF menus displayed in secure sandboxed iframe

User Story:

As a venue that already has a designer menu PDF, I can link it directly without recreating everything in the system.

11. Customer Table Ordering

Figure: Customer Table Ordering

Key Features:

- Zero-friction entry (scan QR, see menu)

- Au

User Story:

As a customer, I scan the QR code at my table and can browse the menu and order in under 30 seconds without downloading anything.

12. Customer - Adding Items to Cart

Figure: Customer - Adding Items to Cart

Key Features:

- Add items with one tap

- Mo

User Story:

As a customer, I can customize my order exactly how I want it and see the running total in my preferred currency.

13. Payment Screen

Figure: Payment Screen

Key Features:

- Payment method selection (M-Pesa, Card, QR, Crypto)

User Story:

As a customer, I can pay using my preferred method and split the bill with friends in 2 taps.

14. Checkout Flow

Figure: Checkout Flow

Key Features:

- Order summary review

User Story:

As a customer, I complete payment in under 10 seconds and receive my digital receipt instantly.

15. Mobile Experience - Table Ordering

Figure: Mobile Experience - Table Ordering

Key Features:

- Touch-optimized interface

- La

User Story:

As a customer on my phone, I can comfortably browse and order with one hand while the interface feels native-app smooth.

16. Mobile Experience - Payment

Figure: Mobile Experience - Payment

Key Features:

- Large, clear payment amount display

- Or

User Story:

As a mobile customer, I can complete payment with a single tap using M-Pesa or my fingerprint for card - no typing required.

Appendix: System Architecture
